Technical Specifications

Model		SH-DPDFC80APE
Machine Type		Double stage pelletizing machine
Resin Type		LDPE - HDPE
Extrusion Capacity		MAX.150 kg/hr Depending on resin type
Extruder Design		Φ80 mm 2- stages Highly wear resistant alloy steel with special heat treatments water cooled feeding zone and optimized screw design,with hard chrome plating
Die screen		hydraulic screen changer
Control / operator interface		Compact cabinet type integrating temperature control systems, indicators, and operator input instruments
Dimensions	Length	10500 mm
	Width	3500 mm
	Height	2000 mm
